PERSONAL PROJECTS

Netflix Clone | *React JS, SCSS, HTML*

Project Link

- As a passionate and skilled web developer, I led the development of a Netflix Clone project. This project was designed and implemented using React, JavaScript, CSS, and integrated with API services.
- Utilized React for building the responsive and interactive user interface, and JavaScript to enhance the functionality of the application, enabling dynamic content loading and user interactions.

Hotel Management | *Java script, HTML, CSS, Webpack, CSS prefix vendor, VS Code*

Project Link

- I have developed a comprehensive Hotel Management Project using JavaScript, CSS, and HTML, showcasing my proficiency in front-end web development and programming.

Search-image-App | *Java script, HTML, CSS, API, VS Code*

Project Link

- Developed an innovative Image Search web application using HTML, CSS, and JavaScript, with seamless API integration to enhance user experience.
- Implemented robust HTML, CSS, and JavaScript codebase, ensuring a user-friendly and responsive interface.
- Integrated APIs to access a diverse and up-to-date image database, optimizing search functionality.

Guessing number game | *Java, IntelliJ IDEA*

August 2023

- Developed a Guessing Number game only for fun. In this project, I am using only Java programming on IntelliJ IDEA.

EXPERIENCE

Cipherbyte | *Internship*

jun 2023

Cipherbyte is a dynamic and innovative software development company.

Worked virtually for a period of month as a Java programmer intern in Cipherbyte.

Work with team |

2021 – Present

I work with the team in my college in electrical forum.

ACHIEVEMENTS

- Retained 1100+ on codechef platform. and awarded by star for Java programming
- Won silver medal in badminton on college level representing My college
- Secured 8.8/10 CGPA in my first year of graduation.
- Secured 76.6 percentage in Higher Secondary School Examination.
